

<b>Water Resources</b>				
<b>#</b>	<b>Environmental Compatibility Indicator</b>	<b>Yes</b>	<b>Partial</b>	<b>No</b>
1	Are water features regularly monitored for algae, erosion, excessive aquatic plant growth, fish kills, and sedimentation?			
2	Wash and wastewater is kept from making direct contact with surface water and is recycled or allowed to filter through a vegetative area when cleaning and maintaining equipment?			
3	Outdoor irrigation of non-golf course areas and indoor plumbing are regularly monitored and maintained for leaks?			
4	Has the golf course staff been provided with stormwater management planning requirements from the installation's environmental staff?			
5	Have part circle irrigation heads been installed where possible to preserve water resources and reduce maintenance while minimizing potential negative impacts to surrounding natural areas?			
6	Are all water feature maintenance tasks coordinated with the installation natural resource manager and bird/wildlife aircraft strike hazard officer?			
7	Has the irrigation system been completely checked for proper water distribution in all irrigated areas and are water leaks fixed in a timely manner?			
8	Are the parking lots for customers and employees at least partially constructed with permeable surfaces and are they drained through an area of turfgrass or vegetation prior to discharge into a water feature?			
9	Does the facility have a Drought Management Plan written, ready, and available when, or if, irrigation restrictions may be instituted?			
10	Are water quality problems immediately reported to supervisors or regulatory agencies (if required) for appropriate action?
